## "C" Series Handle

The "C" Series Industrial Control Grip is our mid sized Compact grip designed to offer 2 or 4 switches in the faceplate as well as the option of a trigger switch or deadman lever.

It is also fully customizable with all the Sure Grip Slider Modules, our Proportional modules, LED's, push on/push off maintained switches and toggle switches. The "C" Series grips can be installed on all of our electronic joysticks.

The cases are molded using a super-tough high impact ABS polymer into a comfortable shape for a rugged, light-weight control handle in extreme duty applications. The standard Sure Grip switches are covered with our tough flexible membrane overlay that protects the switches from dirt and moisture.

### Sure Grip Optional Faceplate Examples
